Summary

Highly motivated Front End Software Engineer with over 4 years of experience crafting scalable, efficient web applications using MEAN stack (MongoDB, Express.js, Angular, Node.js). I am currently working as a Technical Product Consultant specializing in Adobe Target implementation. Possesses strong problem-solving skills and a passion for continuous learning, staying ahead of industry trends and technologies. Thrive in challenging environments, seeking a role to leverage expertise and drive innovation.

Experience

GlobalLogic
Technical Product Consultant (Adobe Target)
05/2024 – Present

- Assisting customers in implementing Adobe Target on their websites to optimize personalization and user experience.
- Creating JavaScript-based offers, recommendations, and A/B testing solutions for targeted user engagement.
- Troubleshooting and resolving integration issues related to Adobe Target across various customer platforms.
- Collaborating with development and marketing teams to enhance customer adoption of Adobe Target solutions.
- Ensuring seamless integration with analytics tools to measure campaign effectiveness and optimize strategies.

Cognizant Technology Solutions
Angular Developer
12/2021 - 4/2024

- Developed high-performance web applications using Angular (13+), Node.js, and AWS, focusing on user experience and scalability.
- Collaborated with teams to design responsive UIs across projects.
- Integrated APIs and managed data flow for seamless interaction and data integrity.
- Contributed to reusable components and maintained a clean, modular codebase.
- Utilized Angular Material, TypeScript, and best practices for efficient development.

Skills

HTML, CSS, Adobe Target, Angular 13, API Handling, MongoDB, Photoshop, Figma, JavaScript, TypeScript, Aws IoT , RxJS, Git, Adobe Launch, Browser DevTools, JIRA,

Certification : Adobe Target expert Business practitioner

Education

Bachelor's in technology (B. Tech) -*Information Technology*
DAV Institute of Engineering and Technology, Jalandhar, Punjab
04/2021

Projects

Air Quality Management System

Summary: Developed a user-friendly Air Quality Management System frontend using Angular and integrated it with a Java Spring Boot backend on AWS.

Key Technologies: Angular, Java Spring Boot, AWS (S3, Lambda), MQTT

Responsibilities:

- Designed and developed the user interface using Angular for intuitive and responsive air quality monitoring.
- Implemented user authentication and secured login/logout functionalities.
- Integrated real-time data visualization using Chart.js for interactive air quality insights.
- Collaborated with backend team to ensure seamless integration and data flow.

Achievements:

- Successfully delivered a user-centric Air Quality Management System frontend.
- Gained expertise in Angular frontend development and data visualization.
- Contributed to real-time air quality monitoring and alerts for end users.
- Enhanced user experience through intuitive design and responsive layout.

World Vision

Summary: Developed and maintained web and mobile applications (Angular for web, Java for mobile) to connect sponsors with children, improving functionality and stability.

Responsibilities :

- Designed and developed user interfaces for web and mobile applications, focusing on intuitive sponsor-child connections.
- Implemented user-friendly registration processes for children and guardians, facilitating field office visits.
- Enhanced user experience with streamlined project management modules for ongoing and past projects.
- Designed module for efficient child-project mapping and sponsor search, improving sponsor engagement.

Achievements:

- Improved frontend functionality and stability of sponsor-child connection platforms.
- Enhanced user experience with intuitive interfaces and streamlined processes.
- Facilitated sponsor engagement and child-project mapping through efficient modules.
- Supported field office visits with user-friendly registration processes for children and guardians.

Book Store

Summary: Developed a secure and user-centric Book Store application using Angular, Node.js, Express.js, and MongoDB.

Key Technologies: Angular, Node.js, Express.js, MongoDB

Responsibilities:

- Frontend design and integration using Angular Material for a polished user interface.
- Implemented robust authentication and authorization for data security.
- Developed efficient data management services for MongoDB integration.
- Enhanced user experience with intuitive features such as pagination and favorites.

Achievements:

- Successfully delivered a secure, responsive Book Store application.
- Gained expertise in full-stack development and data security practices.
- Optimized application performance for seamless user experience on all devices.
